

README for the 'morehype' bundle
Some more hypertext tools
(C) Uwe Lueck 2012/05/26

The bundle consists of three (or six) packages:

- 'texlinks.sty' shorthand macros for TeX-related external
hyperlinks with hyperref or 'blog.sty' below
or ...?
- 'hypertoc.sty' with hyperref, colorlinks=false rehabilitated
- struts in table of content macros
(and decent border colors in 'makedoc.cfg')
- 'blog.sty' fast generation of simple HTML by expanding
TeX macros (LaTeX names where possible), not
involving TeX's typesetting capabilities,
based on file processing with 'fifinddo.sty'
('nicetext' bundle)
- 'blogdot.sty' beamer presentations with 'blog.sty'
- blogexec.sty beamer presentations with 'blog.sty'
- 'lnavicol.sty' web pages with a left-hand navigation column,
based on 'blog.sty'

The packages are described in more detail in 'blog.pdf',
'hypertoc.pdf', and 'texlinks.pdf' ('doc' CTAN directory;
typeset using fifinddo.sty, makedoc.sty, niceverb.sty from the
'nicetext' bundle, <http://ctan.org/pkg/nicotext>).

'morehype' is author-maintained in the sense of LPPL below.

The files listed in 'SrcFILES.txt' and the PDF files generated
from them can be redistributed and/or modified under the terms
of the LaTeX Project Public License; either version 1.3c of the
License, or any later version, see

<http://www.latex-project.org/lppl.txt>

We did our best to help you, but there is NO WARRANTY.

Please report bugs, problems, and suggestions via

<http://www.contact-ednotes.sty.de.vu>

The most recent public version of the bundle is at

<http://mirror.ctan.org/macros/latex/contrib/morehype/>

A TDS version `morehype.tds.zip` of the bundle is available at

<http://mirror.ctan.org/install/macros/latex/contrib/>
